

# GERMS

Some kids may think that germs are bugs or other gross stuff. But germs are actually tiny organisms, or living things, that can make us sick. Germs can be found everywhere, so remember to wash your hands with soap and water, cover your coughs and sneezes, and stay home if you are sick.

Did you know that Germs are so small and sneaky that they creep into our bodies without us noticing.

I heard germs are so tiny that you need to use a microscope to see them.

Exactly, that's how they get into our bodies through our nose, eyes, and mouth.

Yuk, so make sure to wash your hands & cover your coughs and sneezes!!!

Definitely, lets help stop the spread of germs and stay healthy... I am going to go wash my hands now!
